Bipro Bhowmik (Joy)

Web Developer

To develop my potentials of making myself fit for this position, having more understanding with software and web development world and being a competitive programmer it's always a great interest to work in the field of developing to implement the logics and ideas.

I love Developing. It's my passion. I also love Problem Solving. I solve problems with C++, C, Java and Python. I have knowledge about Programming Contests. I have participated a lot of contests with team and individually.
