06/2017 – Present

Back end Developer

Self-learning is a great thing, I love to do. Many things, I have learned myself through books and the internet. For learning web development at home, here is the list of skills you need to acquire HTML, CSS, javascript, a web programming language and a database Broadly these skills are classified as frontend and backend. Under frontend, HTML, CSS, and javascript, then under backend any one web programming language like PHP and Laravel Framework and databases like MySQL, PostgreSQL and SQLServer. And infinityflamesoft.com Laravel Framework course - 06/2017

Achievements/Tasks

- ✓ Laravel Framework
- ✓ Php
- ✓ University final year project 11/2018 - Present- This project Title Food Order System. This app template is useful for a single restaurant. Its features include the ability to search and order specific items as well as cart management, reservations, reservation reminders, and Admob integration. This template also comes with a Laravel admin back-end and HTML CSS BOOTSTRAP JQUERY JAVASCRIPT User Frontend design for configuring details of the restaurant.
