Career Objective:

Web & application develop and system admin

Career Summary:

I have worked as a software developer and system admin. Primarily on windows server. Higly skilled in web services topics.

Special Qualification:

Worked at banglalion as a customer care executive

Employment History:

Total Year of Experience : 17.5 Year(s)

1. Admin & Programmer (February 1, 2008 - Continuing)

www.nam.cm www.velki.com www.shopbangla.com

Company Location : Dhaka

Department: Internet Admin

Duties/Responsibilities:

Programming & system administration & marketing.

www.velki.com (This is my own business) is a web sites directory of Bangladeshi websites. We list and promote websites and run different campaigns to promote web information for Bangladeshi companies at home and abroad.

www.Nam.cm is a project which offers free hosting and domain name registration system for any business or personal website (it's a global project). I developed the project and got involved in extensive marketing campaign to promote the product.

www.shopbangla.com is an online market place for Bangladesh.

2. Cusomer Care Executive (March 1, 2011 - September 29, 2011)

Banglalion Communications

Company Location : Gulshan 1

Department: Call Center

Duties/Responsibilities:

Giving support to customers regarding various issue regarding their internet connectivity, billing etc.

3. Windows programmer (September 1, 2007 - January 31, 2008)

www.lunarpages.com

Company Location : USA

Duties/Responsibilities:

This company offers shared, vps, dedicated web hosting solutions globally.

My primary task was to develop server management and monitoring softwares. I developed scripts and programs in vb, asp and vb.net for server automation and system integration. Also spent time on system administration and testing.

4. Programmer / Administrator (January 1, 2002 - July 21, 2007)

Aspwebsoft Inc

Company Location : Dhaka

Department: Web programming

Duties/Responsibilities:

System administration: To administer windows 2000 and 2003 servers for web hosting, email & database server. Maintain security, backup & recovery; over all administration.

Software Development: Analysis, programming and maintenance of windows 2003 server management software for web hosting management (Web controller), customer support systems, billing manager & Support Chat system & other customized solutions.

One of my main project was Web controller. Web controller is a 3 tier web hosting control panel software with access for server admin, reseller and site admin. The panel could manage iis, ftp, dns, mail, files, asp.net, mysql and other services. Main Languages: vb, asp, jscript, cpp. It has been used by thousands of users and appreciated for its security, reliability and ease of use.

Customer support & consulting: Trouble shooting customers technical problems and offering suggestions and solutions regarding particular projects.

Business Management & Marketing: Day to day management of the business operations and some marketing.
