Showcase

Swstha.com

Project Summary: Swstha.com is Web app , a Portal for patient, doctors & Hospital. Swstha.com works as a appointment Aggregator where a patient can search a doctor and book appointment to the hospital where the doctor works. The portal consist of three different login windows for different stake holders i.e. patients, doctors and hospitals. All the three stake holders have their different account and dashboards, where they can use their different services. The services offered by Swstha.com are:-

- 1.Patient can request an appointment (with a provision of proposing time) to Supplying Party. The request goes on their dashboard on real time basis. Hospital staff has liberty to accept and allot a time which suits doctor's schedule and patient's request. Hospital's staff can also deny the appointment (with a reason). Also, Hospital staff can deny the confirmed appointments and vice versa.

Domain   : Web Application

Technology   : Ruby on Rails
