email:tanzir_aece03@yahoo.com, thpapon2008@gmail.com

Career Objective:

People centric IT professional who delivers highly valuable outcomes that delight customers. Expert at building high performing, self-organizing teams that deliver quality solutions with a naturally low operational overhead.

Career Summary:

To join a company where I can build a long-term career as a Security Expert and work with other talented people to consult clients, analyze systems, design solutions and help lead a team in implementation.

Special Qualification:

Hands-on knowledge on various Pentest and Forensic Tools, ISO27k1, Linux (Kali, RedHat), Burp Suite, Metasploit, Armitage, Nessus, sqlmap, Havij, VMware(Workstation, ESX), Endpoint Security, Firewall, DLP, NAC etc

Employment History:

Total Year of Experience : 9.3 Year(s)

1. **Manager (December 3, 2017 - Continuing)**

bKash Limited

Company Location : 1, Bir Sreshtha Shaheed Jahangir Gate, Dhaka Cantonment, Dhaka-1206

Department: IT Security Operations - Technology

Duties/Responsibilities:

Working as a Manager of IT Security Operations is to perform two core functions for the enterprise. The role is establishing an enterprise security stance through policy, architecture and training processes. The tasks will include the selection of appropriate security solutions, and oversight of any vulnerability audits and assessments. The Manager IT Security Operations is expected to interface with peers in the Systems and Network departments as well as with the leaders of the business units to both share the corporate security vision with those individuals and to solicit their involvement in achieving higher levels of enterprise security through information sharing and co-operation. Daily tasks include:

- # Create and maintain the enterprise's security architecture design, documents (policies, standards, baselines, guidelines and procedures).
- # Create, and maintain the enterprise's security awareness training program.
- # Responsible for working in a 24x7 Security Operation Center (SOC) environment.
- # Performs monitoring, research, assessment, analysis and trending of security log data from a large number of heterogeneous security devices (Intrusion Detection and Prevention tools as well as Anomaly Detection systems, Firewalls, Antivirus systems, proxy devices etc).
- # Provide Incident Response (IR) support when analysis confirms actionable incident.
- # Perform initial risk assessment on new threats and vulnerabilities, perform assessment phase of Vulnerability and Threat Management process.
- # Perform assessment as well as troubleshooting and help isolate issues with IDS/IPS sensors, Antivirus servers, Vulnerability scanners etc.
- # Analyze and respond to previously undisclosed software and hardware vulnerabilities.
- # Investigate, document, and report on information security issues and emerging trends.
- # Integrate and share information with other analysts and other teams.
- # Follow pre-defined actions to handle BAU and High severity issues including escalating to other support groups, execute daily adhoc tasks or lead small projects as needed.
- # Create and maintain operational reports for Key Performance Indicators and weekly and Monthly Metrics.

2. Information Security Specialist (August 18, 2016 - November 30, 2017)

Bashundhara Group

Company Location : BIHQ-2 Plot # 3, Block # G, Umme Kulsum Road, Bashundhara R/A, Dhaka-1229

Department: Information Security & Process

Duties/Responsibilities:

Working as an Information Security Specialist of BG IT is to perform two core functions for the enterprise. The role is establishing an enterprise security stance through policy, architecture and training processes. The tasks will include the selection of appropriate security solutions, and oversight of any vulnerability audits and assessments. The Information Security Specialist is expected to interface with peers in the Systems and Network departments as well as with the leaders of the business units to both share the corporate security vision with those individuals and to solicit their involvement in achieving higher levels of enterprise security through information sharing and co-operation. Daily tasks include:

- # Create and maintain the enterprise's security architecture design, documents (policies, standards, baselines, guidelines and procedures).
- # Create, and maintain the enterprise's security awareness training program.
- # Maintain up-to-date knowledge of the IT security industry including awareness of new or revised security solutions, improved security processes and the development of new attacks and threat vectors.
- # Select and acquire additional security solutions or enhancements to existing security solutions to improve overall enterprise security as per the enterprise's existing procurement processes.
- # Oversee the deployment, integration and initial configuration of all new security solutions and of any enhancements to existing security solutions in accordance with standard best operating procedures generically and the enterprise's security documents specifically.
- # Protects system by defining access privileges, control structures, and resources.
- # Recognizes problems by identifying abnormalities; reporting violations.
- # Implements security improvements by assessing current situation; evaluating trends; anticipating requirements.
- # Determines security violations and inefficiencies by conducting periodic audits.
- # Upgrades system by implementing and maintaining security controls.
- # Keeps users informed by preparing performance reports; communicating system status.
- # Maintains quality service by following organization standards.
- # Contributes to team effort by accomplishing related results as needed.
