Employment History:

Total Year of Experience : 5.6 Year(s)

1. **Software Engineer (May 15, 2017 - Continuing)**

Intelligent Image Management Ltd
Company Location : Dhaka
Department: Software
__Duties/Responsibilities:__
With 2000+ employees across Dhaka, Kolkata, Colombo & USA IIML is one the largest Data Entry/Processing BPO house in the World and the largest in Bangladesh. The main concentrated customer group for the company are from Banks, Insurance, Law Firms, Government agencies like BMD, Census data, Pharmaceutical companies. Company would just scan hard copies to IIML and IIML will provide the final formatted output to the client.

¼ Responsibilities & Achievements:

 Plan new projects in document based on requirements, design database & take ownership to deliver them on time.

 Depend completely on Agile development methodology to the production floor and continuous releases for improvement.

 Develop & Deliver face recognition app for daily attendance using Microsoft face recognition API.

 Write python codes for generating output in TXT, XML, JSON or EXCEL formats to the production managers which leads to the final output created by managers.

 Continuous integration of new features and AI in the existing dynamic data entry software developed in .NET 4.0 Win Form.

 Debug & rectify issues raised from production and delivery earliest by any means.

 Debug SQL Queries by SQL Profile and optimize query where necessary, indexing, archiving for optimized database operation.

 File conversion (PDF to TIFF, TIFF to JPEG, JPEG to JP2) tool development (from scratch) using open source library like Magic.NET, Spire.Pdf.

 Image viewer custom control integration in various projects for image viewing, zooming, cropping & rotating.

 New feature development in internal LMS software(MVC.NET, Database First, JSON)

 OCR Integration in existing projects using libraries like Omni, Abby to reduce key strokes for
data entry operators.

A very challenging environment since It was completely production based, but yet very enjoyable. Not every day regular monotonous routine operation like data driven work.

2. **Software Engineer (June 1, 2016 - May 30, 2017)**

Oyster Pharmaceuticals Ltd.
Company Location : Dhaka
Department: IT
Duties/Responsibilities:
With the head office & factory in Sylhet, Oyster Pharmaceuticals majorly concentrates on exporting processed stripped medicines to foreign countries through Directorate General of Drug Administration. With lack of skilled developers in the local the company was pushing hard to develop their own sales & distribution software to manage their stock and sales.

â¼ Responsibilities & Achievements:

â Create prototypes and demonstrate to management to acknowledge confirmation for the actual operation flowchart or process for the final output.

â Based on prototypes design/create database and prepare UI.

â Practice of Waterfall software development methodology as tightly as possible.

â Develop Sales & Distribution system from scratch and deploy using Win Form, Entity Framework, Database first model.

â Collect & Analyze issues from field level and conduct meeting with NSM (National Sales Manager) to overcome obstacles.

â Provide provision to generate reports of daily, monthly and date wise sales & stock report.

â Test, maintain and recommend software improvements to ensure strong functionality and optimization

â Analyze user requirements and convert requirements to design documents

â Write semantic and commented, well indented codes.

â Due to lack of resources multi-task and change from one task to another without loss of efficiency or composure.

â Communicate effectively and professionally in all forms of communication with management

Widely Used Technologies: ASP.NET MVC, Win Form, SQL Server, SQL Profile, Visual Studio 2013, Team Foundation Server.

The whole IT was responsible on only 3 developers It was a very pressure moment with very underpaid situation. Overall the environment & colleagues were friendly and nice which was enjoyable.

3. **Back End Developer (March 1, 2013 - April 30, 2016)**

Exploria Solutions Ltd.
Company Location : Sylhet
Department: IT
Duties/Responsibilities:
Relying heavily on outsourced projects from UK, USA & Australian market, Exploria Solutions Ltd concentrated mostly on BI Web Application development, Web Design & Mobile Development. A team of 7 people, in the core a sub-team of two people were working more on product development for local market using open source technologies like PHP, MySQL, Javascript & Angular.

â¼ Responsibilities & Accomplishments:
âTransferring project requirements from documents to real live application.
âDesigning optimized database in MySQL and write optimized queries or preparing SP for further usage.
âAndroid apps development for both in house and clients.
âPut business intelligence into code and implement AI"s to sustainable output for business operation.
âStand along project development in various business domain like inventory management, installment management.
âAttend client meeting over Skype or Zoom to understand bug fixes or issues or demonstration purpose.
âR&D for already developed application to enhance the process or reduce loading time on various business applications, and apply modifications.
âStand alone development of portal like Pharmacy Solutions, Sales & Distribution Solution, POS System, Training Center Management. Where all them had basic accounting module.
âReporting to team leader on time to time basis for project status.

Widely used technologies: PHP, MySQL, PHPMyadmin, MantisBT, FileZilla, Netbeans, Grucery Crud, XCrud.

Exploria Solutions Ltd is a startup dreamer company, someday the company might will be an established one, Learned a lot of my skills through that company"s tasks. The mentors there were really helpful for hands on teaching.
