Dear sir

I hope you would consider my application for the Full-Stack Web Developer position at 360° Inc. that has recently become available. I have attached my updated resume that contains detailed information on my qualifications, skills and relevant work experience. I am currently working at Red Square Multimedia in a Full-Stack Web Developer role.

I completed a Bachelor's degree in Leading University, Sylhet .My technical skills include using software such as Dreamweaver, Photoshop, MQ Series, Programming languages such as JavaScript, Jquery, VueJs, Laravel, PHP, HTML, CSS. I have worked with Operating Systems including UNIX, Sun Solaris, and Windows. My daily routine includes developing web applications, supporting maintenance of in-house and out-bound web–based applications, debugging and documentation, designed online marketing materials for clients and designed templates and database systems.

I have produced highlights of my work experience at Red Square Multimedia for your consideration below:

- Established secure web application in addition to developing a back-end database to systematize confidential survey process for a client in the banking sector.
- Worked as part of a team responsible for designing and developing a web presence for an e-commerce start-up with the focus on a user-friendly interface.
- Worked on developing an easy-to-maintain content management system for a resort. Responsibilities included identifying weaknesses in the website, conducted market research and developed innovative concepts for the redesigned website.

I believe my skills and web developing capabilities will make a significant contribution to 360° Inc's strengths. I am grateful to you for the time in reviewing my application. I hope to progress to the next stage in the application process. I look forward to hearing from you soon.

Sincerely

Ashraf Uddin
