**Career Objectives**

Searching for a desirable opportunity where I will have the scope to utilize my skills and potential to do something innovative for the benefit of mankind and the society as well and through the way to gain organizational targets and efficiencies that will be a matter of pride and honor to build up a dynamic career.

Technical Knowledge:

1. Framework: Flutter, Bootstrap, CodeIgniter.
2. Programming Language: Dart, C, C++, Python, JavaScript
3. Database System: SQLite, Firebase, MySQL, Oracle.
4. Operating System: Windows 7/8/10, Linux, Mac.
5. Project Management: Trello.
6. Version Control: Git.
7. Application Software: Microsoft Office suite, MatLab.
8. IDEs: PHPStorm, PyCharm, VS Code, NetBeans, Code Blocks.
9. Design Language: HTML5, CSS3.
10. Conceptual Knowledge: Data Structure, Algorithm.

Projects:

1. **Youtube Player:** Git: https://github.com/mdRazunMia/flutter_youtube_player.git

I have made a cross platform mobile application by using flutter for playing youtube videos. In this app, one can play videos from a youtube channel that will be assigned and the information of the owner of the channel and the number of subscribers of that channel will be displayed on top of the home screen. When one user of the application clicks on a video, it will be displayed on another screen just like a youtube player. For this application, I have used the youtube API.

2. **Online Shopping:** Git: https://github.com/mdRazunMia/flutter_shop_app.git

For developing this application, I have used flutter. The owner will be able to upload the products on the basis of different types of categories. The customer will be able to see all the products by using this application. The customer will also be able to make a list of his favorite items among all the products and the list of all the products will be shown as a card. The customers will also be able to change the products from the card as well.

3. **Recipes App:** Git: https://github.com/mdRazunMia/flutter_recipes_app.git

Flutter has been used to develop this application. In this application different kinds of recipes will be displayed with their respective ingredients to those recipes. The types and the nutrition related information will also be displayed with each of the recipes.

4. **ToDo:** Git: <https://github.com/mdRazunMia/ToDo.git>

Flutter also has been used to develop this application. In this application one user can be able to make a list of Todo. In every Todo, one user will be able to add a title and the current date will be added to the Todo list and when the list will be displayed, It will contain a title and a date will be displayed just under the title. In this app, I have added “**Local notification system**”.

3. **Text Converter:**

By using java, I have developed a software that converts the text into uppercase, lower case, camel case based on the given input.

4. **Employee Management System:**

In the Employee Management software, I have implemented a system that manages the employee information, salary etc.

5. **Quiz Contest:**

As a course work for project work-2, I have made an Android system for Quiz Contest.

6. **Solutions Overflow:**

As a fourth year final project, I have developed a web based questions and answering system within a group of three members where users can upload their questions and get their solutions. There are also some facilities to send requests to some experienced person to solve the problem. There are also comment options for the users. I have done some development work basically in the admin panel and also some design work for the system.

7. **Result Management:**

For the completion of my project work-1, I have developed a system to find the grading of the students' results and stored the history of the course of the students and also have other facilities for the teachers.

8. **Hotel Grand Zafran:**

As a client project, I and one of my friends have developed software for the Hotel Grand Zafran.

9. **News Portal:**

I also work on a project with my friend for the development of a News Portal. For the

development of that project, we have used codeIgniter a php Framework and HTML4 and css3.

Language Skill

Proficiency in English language is good.

Academic Qualifications

❑ M. Sc. in Computer Science & Engineering

University : Shahjalal University Of Science and Technology

Department : Computer Science and Engineering.

Result : N/A

Year of passing : 1st and 2nd semesters have been completed and only final (3rd) semester's thesis presentation left. The presentation is being delayed due to covid.

❑ B. Sc. in Computer Science & Engineering

University : North East University Bangladesh

Department : Computer Science and Engineering.

Result : 3.82 on a scale of 4.00.

Year of passing : 2017.

❑ Higher Secondary Certificate

College : Muktagacha College.

Group : Science.

Result : 4.30 on a scale of 5.00

❑ Secondary School Certificate

School : Chachua High School.

Group : Science.

Result : 5.00 on a scale of 5.00
